

RUESCH

XRE ELECTRIC

Go Green

Enjoy the benefits of going GREEN with the RUESCH XRE Utility Vehicle. The first electric UTV built for those who need more out of electric transportation.

The XRE has a running capacity of 20 or 30 mph for a full 6 hours powered by an American made Altrax controller and 6 8-volt batteries. With a 60 mile range the XRE is a perfect choice for all types of applications. The 48 Volt DC system and 6 hour charge time is more than enough to quickly get you where you want to go. The best part is it's quiet and safe for the environment.

Go GREEN with RUESCH.
